

SWARN LEKH

JEWELLERY ERP SYSTEM FLOW DOCUMENT

PROJECT OVERVIEW

Swarn Lekh is a Jewellery ERP Software designed specifically for jewellery shops, gold loan businesses, and retail jewellery stores.

The software focuses on:

- Fast daily operations
- Easy inventory handling
- Quick billing process
- Mortgage/Gold loan management
- Minimal staff training
- Mobile-friendly usage
- Clean and modern interface

The system should reduce manual work and provide a smooth workflow for shop owners and staff.

CORE MODULES

1. Inventory Management
 2. Mortgage / Gold Loan Management
 3. Billing & Invoice Management
-

MAIN OBJECTIVES

The software should help jewellery businesses:

- Manage gold and silver stock
- Track sold and available products
- Generate invoices quickly
- Handle customer mortgage loans
- Calculate interest automatically
- Maintain customer records
- Reduce inventory automatically after sales

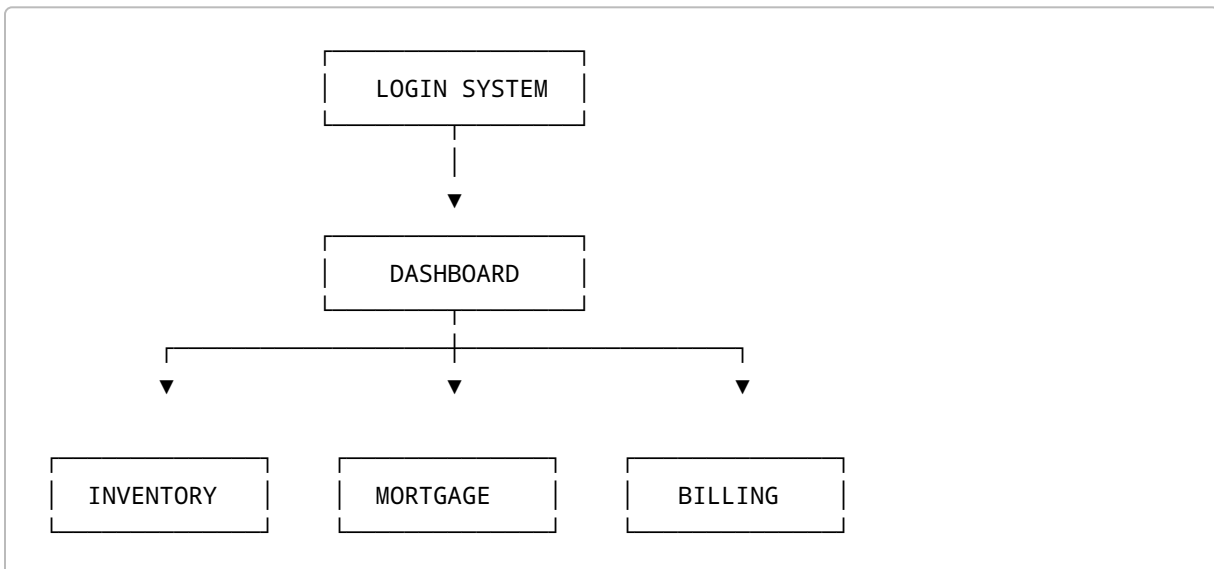

- View reports and dashboard summaries

USER EXPERIENCE GOALS

The UI/UX should feel:

- Simple
- Clean
- Fast
- Professional
- Easy to learn
- Mobile Friendly
- Touch Friendly
- Minimal Clicks
- Easy Navigation

SYSTEM ACCESS FLOW

LOGIN SYSTEM

Purpose

Secure access for shop staff and admin users.

Login Features

- Username & Password Login
- Mobile Number Login (Optional)
- Role-Based Access
- Remember Login Session
- Logout Option

User Roles

Admin

Can access:

- Inventory
- Billing
- Mortgage
- Reports
- Settings
- User Management

Staff

Can access:

- Billing
- Inventory View
- Limited Mortgage Access

MAIN DASHBOARD

The dashboard should provide a quick overview of business operations.

Dashboard

- |
- |— Total Gold Stock
- |— Total Silver Stock
- |— Monthly Sales
- |— Pending Mortgage Interest
- |— Active Loans
- |— Sold Products
- |— Quick Actions
 - |— Add Stock

- └─ New Bill
- └─ Add Mortgage

DASHBOARD FEATURES

Summary Cards

- Total Gold Weight
- Total Silver Weight
- Total Inventory Value
- Monthly Revenue
- Pending Interest Amount
- Active Mortgage Loans
- Today's Sales
- Total Bills Generated

Quick Actions

Buttons should be visible on top:

- Add Stock
- Create Bill
- Add Mortgage
- Search Product
- Search Customer

Dashboard Charts

Optional charts:

- Monthly Sales Graph
- Gold Stock Trend
- Loan Collection Graph
- Daily Billing Summary

MODULE 1 — INVENTORY MANAGEMENT

PURPOSE

Manage jewellery stock in a simple and organized way.

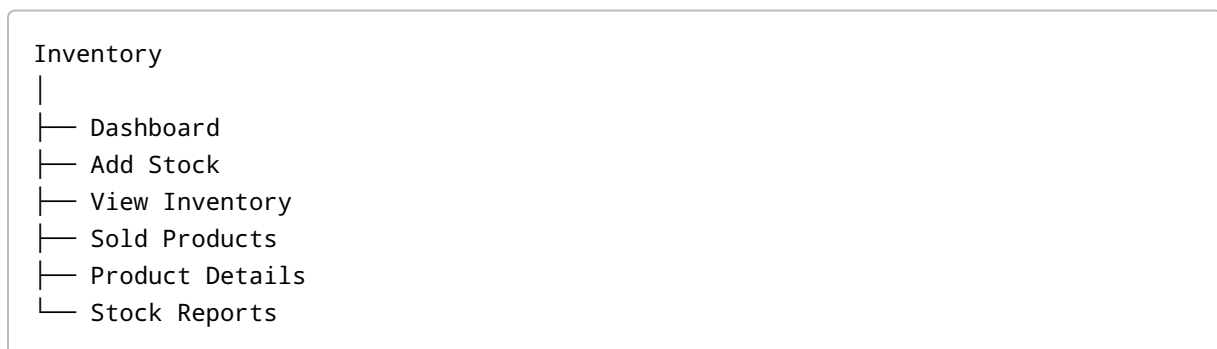

The inventory module should help staff:

- Add jewellery products
- Track stock availability
- Manage gold and silver items
- Track sold products
- Search products quickly
- View product details instantly

AFTER BILL GENERATION

SYSTEM AUTOMATIONS

Inventory Automation

- Reduce stock automatically
- Mark sold products
- Update stock reports

Billing Automation

- Generate invoice number
- Save invoice history
- Calculate GST automatically

Mortgage Automation

- Calculate interest
- Update pending balance
- Generate payment receipts

REPORTS MODULE

The system should provide reports for:

Inventory Reports

- Current Stock Report
- Sold Products Report
- Low Stock Report

Billing Reports

- Daily Sales Report
- Monthly Sales Report
- GST Report

Mortgage Reports

- Active Loans Report
 - Interest Collection Report
 - Closed Loans Report
-

SEARCH & FILTER FEATURES

Search should be available everywhere.

Users should search by:

- Product Name
- Design Number
- Customer Name
- Invoice Number
- Mobile Number

Filters:

- Date Filter
 - Category Filter
 - Branch Filter
 - Status Filter
-

MOBILE RESPONSIVE DESIGN

The software should work properly on:

- Desktop
- Tablet
- Mobile Devices

Mobile UI should include:

- Large buttons
 - Touch-friendly forms
 - Responsive tables
 - Fast loading pages
-

UI DESIGN RULES

Developer should follow:

1. Minimal clicks
2. Large buttons
3. Simple tables
4. Fast forms

5. Mobile responsive
 6. Clean spacing
 7. Easy navigation
 8. Search visible everywhere
 9. Important actions highlighted
 10. Dashboard should feel simple
 11. Use readable fonts
 12. Avoid cluttered screens
 13. Use clear icons
 14. Keep forms short and fast
-

SECURITY FEATURES

The system should include:

- Secure Login
 - Role-Based Access
 - Data Backup
 - Activity Logs
 - Invoice Protection
-

FINAL GOAL

Build a jewellery ERP software that is:

- ✓ Very simple
- ✓ Easy for staff
- ✓ Fast for billing
- ✓ Easy inventory management
- ✓ Easy mortgage handling
- ✓ Clean UI
- ✓ Mobile friendly
- ✓ Minimal training required
- ✓ Fast performance
- ✓ Professional design
- ✓ Scalable for future growth
